

SpatialCam

an IP Company

Dear IP Professional,

This document contains a list of issued patents and pending patent applications assigned to Spatial Cam LLC. Please check www.uspto.gov for the actual status of the portfolio.

A copy of this document can be downloaded from <http://www.spatialcam.com/portfolio.pdf>. The document has live links to the USPTO database to make review easier.

Many applications are still alive, even after issuance, by continuations and continuations-in-part. It is your own responsibility to determine the actual status of the portfolio. This document is provided “as is” for your review and you should not rely on this document to assess the status of individual cases.

The subject matter of the portfolio

The subject matter of the portfolio is related to imaging such as the generation of registered images in a simple manner. It includes easy and inexpensive construction of panoramic and stereoscopic multi-lens cameras in consumer devices such as camcorders, smart-phones, inexpensive compact cameras and in other devices.

Other subject matter relates to:

- multi-screen display for broad scene viewing;
- multi-program viewing enabled image storage;
- panoramic cameras for gaming;
- multi-screen walls to create a virtual office building;
- tablet/e-readers as video conferencing device;
- e-reader/tablets as a viewing platform for cameras in mobile cameras;
- remotely tablet/e-reader controlled platform for tracking cameras; and
- reversibly modifying a video to allow viewing at a reduced quality.

The subject matter listed above is not exhaustive and it is your own responsibility to review any of the issued patents or published patent applications for the disclosed subject matter. Some of the inventions are described in provisional patent applications and/or may not have been claimed yet. Search USPTO PAIR for the provisionals.

How to access the portfolio

Please click on a specific patent number or patent application number to open a related web site at the U.S. Patent and Trademark Office (USPTO).

ISSUED Patents

8,164,655	Systems and Methods for Concurrently Playing Multiple Images From a Storage Medium
8,355,042	Controller in a camera for creating a panoramic image
8,416,282	Camera for creating a panoramic image
8,803,944	Controller in a camera for creating a registered video image
8,890,977	Systems and methods for concurrently playing multiple images from a storage medium
9,171,221	Camera to track an object
9,502,003	Apparatus and Methods to Display a Modified Image
9,531,965	Controller in a camera for creating a registered video image

PUBLISHED Patent Applications

20090284620	Systems and Methods for Concurrently Playing Multiple Images From a Storage Medium
20100097442	Controller in a Camera for Creating a Panoramic Image
20100097443	Controller in a Camera for Creating a Panoramic Image
20100097444	Camera System for Creating an Image From a Plurality of Images
20110098083	Large, Ultra-Thin And Ultra-Light Connectable Display For A Computing Device
20120149432	Systems and Methods for Concurrently Playing Multiple Images From a Storage Medium
20130135429	Controller in a camera for creating a registered video image
20130229529	Camera to Track an Object
20140267775	Camera in a Headframe for Object Tracking
20140300692	Controller in a camera for creating a registered video image
20150340016	Apparatus and Methods to Display a Modified Image

Other applications may have been filed that have not yet been published.
